## Version

192.168.10.64/26. Note from the above table that this is subnet number 1. Since 28 hosts are required, 5 bits will be needed for the host addresses,  $2^5 - 2 = 30$  usable host addresses. Thus 5 bits will be required to represent the hosts and 3 bits will be used to represent the extended-network-prefix of /27.
